Profile

I am a highly skilled web and mobile app developer with 12+ years of experience creating innovative, user-friendly digital solutions. I specialize in building intuitive and visually appealing websites and mobile applications using a wide range of technologies. Known for my attention to detail and collaborative approach, I work seamlessly with designers, product managers, and developers to deliver high-quality solutions that drive business success. Passionate about staying current with emerging technologies, I continuously seek new challenges to enhance user experiences and deliver impactful results.

Beyond coding, I am an avid problem solver and lifelong learner who enjoys exploring new technologies and creative approaches to complex challenges. I am known among my peers for my curiosity, adaptability, and positive energy, which I bring to every project, helping teams stay motivated and focused on delivering exceptional results.

Professional Experience

10/2021 – 12/2023
Dhaka, Bangladesh

EFGT (Kukd.com)

Sr. Developer

Driving the development and evolution of Kukd in the UK, I lead website and mobile app design using Laravel, React.js, and React Native. By leveraging emerging technologies, optimizing performance, and ensuring seamless user experiences, I deliver robust, high-quality solutions for our customers.

10/2021 – 12/2023
Dhaka, Bangladesh

Amber IT (ChefOnline)

Sr. Web and Mobile App Developer

Leading the development and optimization of ChefOnline in the UK, I specialize in CodeIgniter for web and mobile platforms, ensuring high performance, seamless functionality, and a superior user experience through continuous innovation and maintenance.

11/2012 – 11/2020
Khulna, Bangladesh

Systway Ltd.

Senior Front-end Developer

Specializing in web application development, I have extensive experience building React and React Native apps with APIs. I excel at translating UI/UX designs into responsive HTML and creating custom WordPress themes and plugins, delivering tailored, high-quality solutions.

12/2020 – 09/2021
Dhaka, Bangladesh

SYP Solutions Ltd

Sr. Web Developer

As a web design and development specialist, I focus on OpenCart customization, delivering both simple tweaks and extensive platform enhancements. With a strong eye for design and user experience, I create functional, visually compelling websites that exceed client expectations.

Projects

12/2022 – 12/2023

HashAds

Mobile Wallet System - (IOS and Android)

The mobile wallet app uses REST API for seamless communication with the server, ensuring swift and reliable transactions. For transaction security, we utilize the JWT (JSON Web Token) standard for authorization, coupled with two-factor authentication. This app boasts a fully responsive screen design, allowing for an optimized experience across all devices.

ChefOnline – Order Takeaway App

IOS and Android

Developing a food ordering platform app involves creating a user-friendly interface, integrating payment gateways, and connecting with restaurants.

ChefOnline Partner

Manage Order, Reservations and Restaurant Setting Panel for B2B - (IOS and Android)

Developing a B2B App for Powerful features like inventory management, order tracking and Epos dashboard with Marketing Features.

Bayleaf Restaurant & Takeaway

IOS and Android

Artauk

IOS and Android

Salikandco

React JS

Sales Lettings & Management
